WatchGuard ThreatSync® Purchase Options

ThreatSync offers a core set of XDR capabilities, including AI-driven event correlation and remediation, available at no added charge with qualifying network and endpoint security product purchases. ThreatSync+ product licenses are purchased separately, adding an additional layer of advanced XDR threat detection, capabilities, such as third-party data feeds and deep AI-based monitoring, detection and investigation.
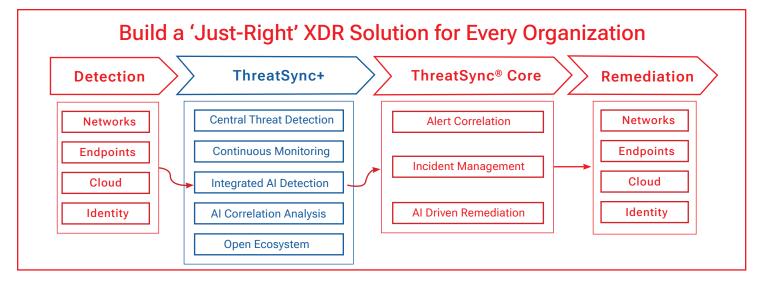

ThreatSync Core   ThreatSync+ NDR   WatchGuard Compliance Reporting

Build a 'Just-Right' XDR Solution for Every Organization

Detection	ThreatSync+	ThreatSync® Core	Remediation
Networks	Central Threat Detection	Alert Correlation	Networks
Endpoints	Continuous Monitoring		Endpoints
Cloud	Integrated AI Detection	Incident Management	Cloud
Identity	AI Correlation Analysis		Identity
	Open Ecosystem	AI Driven Remediation	

WatchGuard's family of ThreatSync XDR products enables MSPs and companies of every size to build XDR functionality, including the advanced capabilities needed to protect their environments. Select and deploy the ThreatSync products to tailor a solution to your needs.

- **ThreatSync Core** includes foundational XDR capabilities of 1) threat information correlation, 2) incident scoring and management, and 3) intelligent automated remediation. The ThreatSync Core features are platform-ready, and are available with participating WatchGuard product activation for no additional charge.

- **ThreatSync+ product licenses** can be purchased separately to layer on advanced XDR capabilities such as 3rd-party product feeds and deep AI-based monitoring, detection and analysis.

  ThreatSync+ products include:

  - **ThreatSync+ NDR:** a 100% Cloud-native, AI-powered network threat detection and response solution that requires no hardware and defends on-premises, VPN, and identity threat surfaces and defends North/South, East/West, VPN, and internal device threat surfaces.

  - Future ThreatSync+ products coming in 2024 and 2025

- **WatchGuard Compliance Reporting** augments the reports available with ThreatSync products and WatchGuard Cloud to provide a rich package of reports for companies that need to continuously ensure compliance with regulations for business and financial success. This package is used with XDR solutions to provide on-demand compliance reporting and optimal compliance practices.

WatchGuard ThreatSync Options

	ThreatSync Core *Included with WatchGuard products*	ThreatSync+ *Requires additional licenses*	WatchGuard Compliance Reporting *Optional add-on, requires additional license*
Threat information correlation	●	●	
Incident scoring and management	●	●	
Intelligent automated remediation	●	●	
100% Cloud native	●	●	
Includes WatchGuard network & endpoint security products	●	●	
Standard XDR reports	●	●	
Includes open XDR architecture (3rd-party products)		●	
Continuous monitoring advances		●	
Integrated AI detection		●	
AI correlation analysis		●	
Advanced Network, Device, Traffic, and Incident Dashboards		●	
Comprehensive N/S/E/W Network Detection and Response (NDR)		With ThreatSync+ NDR license	
Network Threat Visibility and CISA Ransomware Defense Reports		With ThreatSync+ NDR license	●
Over 100 regulatory controls mapped to compliance reports			●*
Automated continuous compliance for ISO- 27001, NIST, CMMC, UK and Cyber Essentials			●
Configurable to support insurance audit compliance with CIS Critical Security Controls, and IEEE standards			●

* Regulatory control frameworks for networks are built into the ThreatSync+ NDR license. These control frameworks drive the information that is delivered via WatchGuard Compliance Reporting.

Smart Security, Simply Done.

ThreatSync+ NDRs' unique Cloud-native delivery model provides enterprise-class cybersecurity at a fraction of the cost of traditional NDR or SIEM tools. Deployed in just hours, ThreatSync+ NDR is designed for operational success in any environment.
